Overview

Integra's Fixed Asset Depreciation and Amortization interface provides a comprehensive solution to your Fixed Asset Depreciation needs.

By partnering with BNA Software's Solution experts and their comprehensive product suite, Integra's integrated fixed asset interface delivers the best fixed asset solutions with guaranteed tax and regulatory compliance. BNA Software solutions can be installed straight out of the box and immediately configured to interface with Integra General Ledger and Financial applications to meet the depreciation needs of your organization.

Integra's configurable Chart of Account coding identifies Fixed Asset and Lease & Well Equipment accounts via user defined Asset Type Classes that make the interface to BNA Fixed Asset Depreciation easy to use and flexible.

Integra is pleased to add BNA Software to our list of technology partners. Our commitment to the industry includes integrating with state-of-the-art asset management products to help our users automate and streamline their tax and regulatory compliance needs. For more information on BNA Asset Management solutions you may view their Product Literature and Success Stories on the web at <http://www.bnasoftware.com>.

BNA Reviews and User Comments:

"Strong asset management functions with outstanding reporting capabilities. The system's open timeline structure enables enhanced control and accuracy of asset management, while also maintaining a detailed audit trail." - Five Star Rating, The CPA Technology Advisor

"The program has so many options, and at the same time is very user friendly. When It comes to asset updating, I have total control. The program does a great job of tracking the appropriate depreciation on our old assets as well as our new assets ... the reports are great and easy to customize." - Diane Sulier, Therma Tru Corporation
