

INTEGRA ENERGY™ Land Mapping Interface

The Integra Lease and Tract Management application's database manages your company's lease inventory, acreage, mineral ownership information and related narrative text, obligations, rentals, payments, etc. for these lease agreements.

Via an integrated data Export capability, the system is able to integrate with a 3rd Party Mapping product -- the GeoGraphix LeaseMap system.

Land Database Features

- Lease Agreement Database
- Tract Information Database
- Chain of Title Database
- Tract Map Reference Database
- Producing Property Database
- Lease Obligations Database
- Lessor Payment History
- Mineral Ownership & Acres
- Partner Ownership Interests
- Narrative Text Database
- User-Defined Data & Provisions

- Lease Export Data Selector
- Published Data Model Export
- GeoGraphix Export Format

Overview

The Integra Lease & Tract Management application provides comprehensive management of lease records, tracts, mineral ownership, delay rentals, lease obligations, etc. and reporting and analysis functions required by land and lease owners. The system provides for entry and maintenance of lease information, rental payments and rental billing information, as well as legal descriptions, remarks, special obligations, well references, tracts and leasehold ownership information.

Leading edge mapping capabilities are provided by interfacing with the petroleum industry Geo-Spatial Mapping and Data Analysis product, GeoGraphix LeaseMap. Integra provides a standard data export capability with a published data model specification for interfacing to any vendors' mapping application and provides specific export formats for direct support of popular applications such as LeaseMap, etc.

Integra's integrated Lease and Tract data selectors provide a powerful selection capability to identify the leases and tracts and related data to be exported via the mapping interface. Data exported via these exports include information relative to: Leases, Lessors, Partners, Tracts, Mineral Ownership and Map References.

By building alliances with industry partners, Integra is able to provide the best of breed mapping and spatial analysis tools while providing you with integrated Land, Accounting and Production data management solutions.
